

'The Morning After' Santa

A fun and versatile project with many variations from the free downloadable templates.

Click on the buttons above to watch the video, print out the instructions worksheet, print out the templates and buy the materials needed for this project.

You will need plain card in the colours of your choice, double-sided tape, foam pads and colouring pencils or pens. You might like to add glitter too.

- 1 Print out the downloads of the shapes onto card but don't cut out yet.
- 2 Use colouring pencils, felt tips or whatever you prefer to colourise the shapes required from the templates.
- 3 Carefully cut out the chosen shapes.
- 4 Now take your desired sheet of card and cut and/or fold to size to make the basic card itself. Add some coloured card for background or detail if desired.
- 5 Assemble the components of your card front with double-sided tape and/or foam pads.

Add peel offs and more detail if you like. You can even use acetate instead of card then glue and glitter from behind for a different effect.
